To Whom It May Concern:

This letter is an endorsement of Dr. Svetlana Masgutova who travels all over the world training people in her unique method of Neuro-Sensory Motor Reflex Integration. This unique method is used to invite the mind/body system to become whole - for the various reflexes to integrate into whole body movement.

I have taken five of her courses and have sponsored her to teach here in Portland Maine. The participants for these courses come from a broad spectrum of modalities : occupational and physical therapists, speech pathologists, parents, health kinesiologists, chiropractors, osteopathic doctors and more. All of them have been astounded with the rapid results of this method of work. I plan to bring her back to teach other courses. I have witnessed dramatic changes in children with developmental delays, ADHD, cerebral palsy, bedwetters, vision and auditory challenges. Many of the children in my private practice who had reached a plateau in their healing began to make enormous strides using Dr. Masgutova's methods. We see in her, not only a highly intelligent person who has done extraordinary research for the last 20 years, but also a very warm, compassionate person who helps each person reach his/her goals. She invites each person to step forward and become a "winner". She works "with" the person she is treating. I have also witnessed dramatic changes in adults as well – autistic, and stroke victims.

Although I have known and worked with many very talented therapists, I hold Dr. Masgutova in the very highest regard. I feel blessed that I have had the opportunity of attending her trainings which have greatly increased my knowledge and ability to help others.

Please contact me if you have any questions.

Sincerely,

Beth Stoddard
