To Whom it May Concern,

This is a letter of endorsement for Svetlana Masgutova, PhD. I have attended courses offered by Dr. Masgutova since 2006. I will continue to take courses from her since I simply cannot learn the material she shares in any other venue.

My clinical training has included multiple trips to central Europe to study with neurologists and therapists who utilize developmental movement patterns as a means of diagnosis and treatment. This education is simply not offered in such depth in the United States, except when these professionals visit the US to teach.

Utilizing her strong background in Developmental Education and Psychology, plus the diversity of her clinical experience, Dr. Masgutova has applied the body of knowledge of developmental principles in a unique manner. She successfully implements this knowledge beyond the neuro-musculo-skeletal arena in which the principles are used by other clinicians.

Dr. Masgutova's approach is unique, cost-effective, and firmly rooted in science. The combined body of knowledge she embraces, her strength as a clinician, and her ability to teach what she knows, is exclusive.

I am honored to have the opportunity to learn from her.

Sincerely,

Susan Wenberg, MA, DC
